

# SurveyXact

## – a comprehensive survey and questionnaire tool

Professional questionnaire surveys are easy with SurveyXact. Even if you are not a professional pollster. SurveyXact provides a comprehensive, user-friendly, and flexible online application for the implementation, analysis, and presentation of any kind of survey.

### Collection – from email to telephone interview

SurveyXact lets you collect valuable knowledge in whatever form that best suits your respondents: by email, letter containing an internet code, paper questionnaire, web survey (links, pop-up, pop-in), telephone interview – or a combination of several methods.

### Scandinavia's leading survey tool

Support for SurveyXact is provided by the developers – the top Nordic consultancy house, Rambøll Management, has more than two decades of experience with surveys for private companies and public organisations. The software was first developed in 1999 as a professional internal tool for Rambøll Management. Since then, SurveyXact has been refined and developed to become the leading survey tool in Scandinavia.

## All-in-one survey tool

SurveyXact is the most comprehensive and user-friendly survey production tool on the market. It allows any private or public organisation to quickly and easily design its own professional questionnaire surveys.

### SurveyXact allows you to:

- ✔ Access the application from any computer with internet access
- ✔ Copy questionnaires from e.g. MS Word.
- ✔ Customise surveys to fit your graphic design guidelines
- ✔ Design dynamic questionnaires that display only relevant questions to individual respondents
- ✔ Reach respondents by email, letter containing an internet code, paper questionnaire, web survey (links, pop-up, pop-in), telephone interview – or a combination
- ✔ Carry out surveys in any language
- ✔ Import contact and respondent details
- ✔ Send out reminders to respondents who have yet to answer
- ✔ Check data quality upon completion of the survey
- ✔ Create analyses and reports
- ✔ Present data as tables or graphics
- ✔ Design folder structures with surveys in all folders
- ✔ Add users with different access rights in each folder, to only allow access to surveys in specific folders and subfolders in the application (see chart on back)

SurveyXact gives you a range of options for analysis of collected data. Results can be presented graphically or in tables.

# Software, training, support, consultancy

– We can help you at every step

The illustration on the right shows the phases of a typical survey – from establishing the purpose to evaluating the survey upon completion. Surveys are often viewed as a continual process. You may want to repeat a survey the following year to measure any development, or perhaps the results of your initial survey raise new questions that you need to clarify with a follow-up.

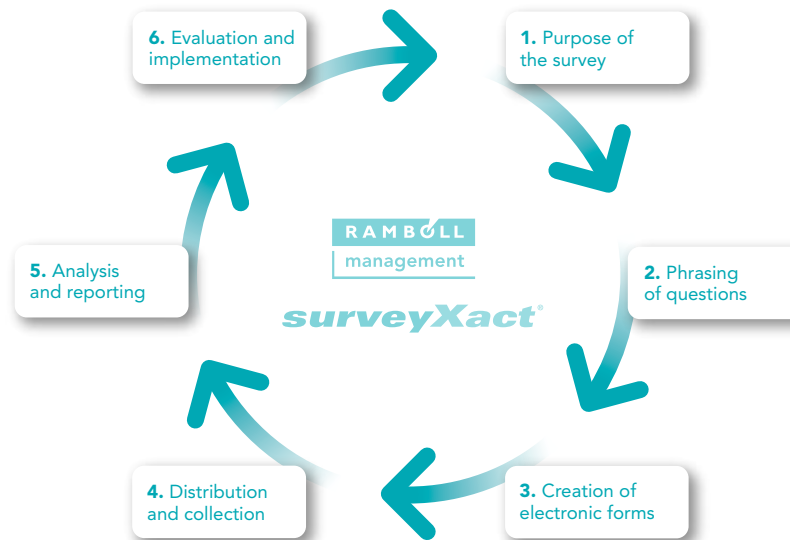

## SurveyXact – more than a tool

SurveyXact does most of the work for you. You can easily create electronic questionnaires, distribute them, and collect data to analyse and present. In addition, Rambøll Management can provide assistance in every phase of the survey – tailored to your organisation's specific needs. We can help phrase delicate questions, handle bulk telephone interviews, analyse your data, supply training, and much more.

## Rambøll Management guides your way

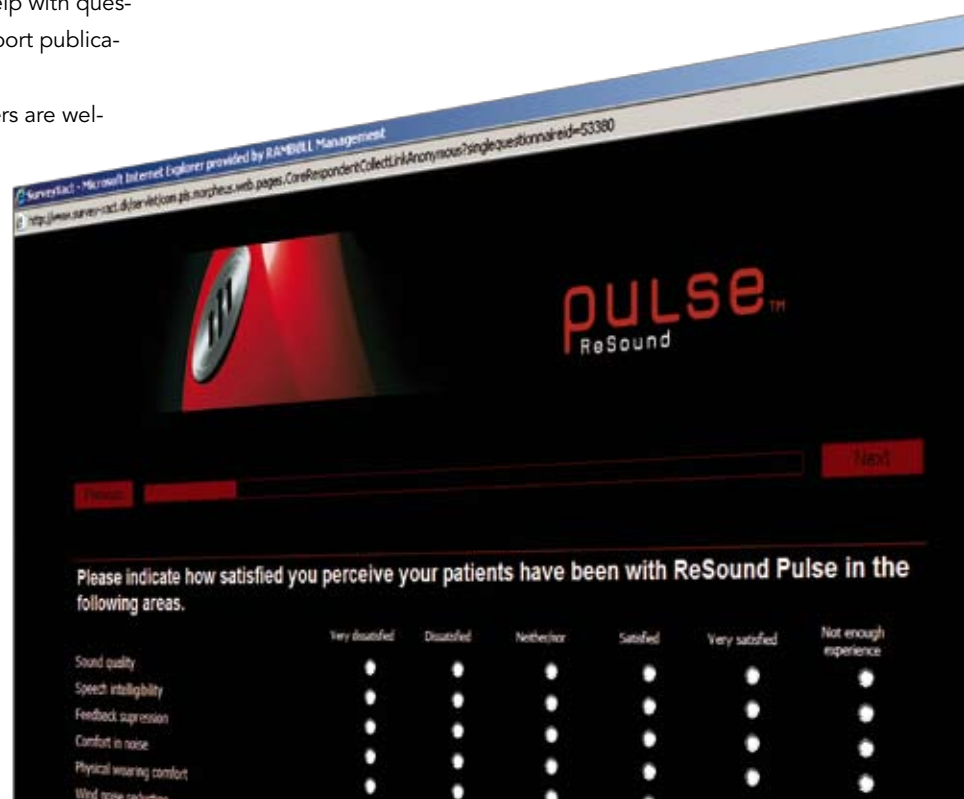

Rambøll Management can help your organisation in many ways:

- ✔ **Training:** From free introductory courses for SurveyXact's new users to advanced methodology training for professional users
- ✔ **Support:** Professional support by telephone
- ✔ **Consultancy:** Rambøll Management can help with questionnaire production, data analysis, and report publication – according to your needs
- ✔ **Telephone interviews:** SurveyXact customers are welcome to draw on Rambøll Management's team of 100 telephone interview professionals for large surveys.

The illustration above shows the phases of a typical questionnaire survey. It is important to view evaluation as a continual process.

There is virtually no limit to how you can design a questionnaire in SurveyXact.
